Importance: High
Attachments: [Hill Briefing 1 13 10.ppt](#)

Working off Rebecca's initial materials ---- It still needs work but it now includes additional slides on other RFS2 related issues of interest, background, modified LCA slides, etc.

NOTE: I don't have registration and reporting slides in here now. Not sure if hill cares or is interested but we might think about 1 or 2 slides that just carry the message of general program function.

Thoughts?

All slides will need to be looked at for opportunities for simplification of information and messaging. Feel free to take a peek and crack at it. I won't likely get back to this until tomorrow.

hi paul:

Here is a first crack at the hill slides covering lca. We are going to run this by sarah tomorrow but thought it would be good to get to you to start combining with the other material we want to cover.

Subject: Hill Briefing

Here is a draft for the Hill briefing, I can bring copies tomorrow

Question - will this be on the whole program, i.e., cellulosic mandate, renewable biomass definition, wavers, etc?

Right now I only included the lifecycle piece
